[(ALWAYS HUMAN)]

TechQuartier

This free nine-week bootcamp is for young professionals and students interested in learning about AI and machine learning. The program is virtually online. Curious people from all around the globe are welcome to apply.

Scan to apply

Deadline to apply is 30 Sept.  
The program starts 9 November,  
in Frankfurt and virtually globally.

Supported by:  Bundesministerium für Wirtschaft und Energie  TechHippo  ING

This fall, **TechQuartier** is hosting a new, exciting and free program focusing on Artificial Intelligence, Machine Learning and Entrepreneurship.

**AiTalents** was created to bring together entrepreneurs, young professionals and students from all over the world to deepen their understanding of AI and how to use this technology to make a difference.

During a **nine week bootcamp**, participants will work in small teams on solutions using concrete data sets provided by real startups that are looking to expand their business models through the systematic use of data/machine learning.

In addition, various company partners and experts/coaches will offer insights and real-world ideas. **All teams will be professionally coached and supported during the program.**

This program is also a mixture of live and virtual learning opportunities. TechQuartier is gathering together thought leaders and teachers from many areas of AI and joining this knowledge with entrepreneurship expertise only like TechQuartier can do.

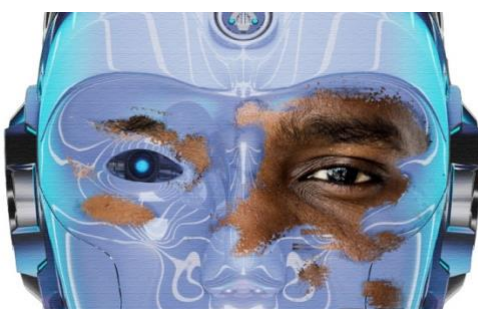

Once again, our program is **free** for all participants.

AiTalent's goal – harness the technological possibilities together to impact the future.

TechQuartier's goal – create opportunities for the future thinkers in Europe and world.

**Applications are possible from now on and until 30 September 2020.**
